HLX22-T Series

Temperature Transmitter with interchangeable probes

Unique for the HLX22-T series are the interchangeable sensing probes with connector.

The calibration data is stored in the probes, which are therefore interchangeable and probe replacement does not affect the performance of HLX22-T.

The outstanding accuracy over the entire temperature range is based on very precise calibration methods and on the latest microprocessor technology. Well-proven humidity sensor elements ensure excellent long-term stability.

For high temperature applications (up to +80°C / +176°F) or in case of limited space availability, the sensing probes can be connected to HLX22-T housing with cables (2m, 5m or 10m / 6.6ft, 16.4ft or 32.8ft) without any repercussions for the overall accuracy of the instrument.

Voltage 0 - 1 / 10V or current 4 - 20mA (2 wire) outputs are available, of which the temperature output can be scaled according to the application (see ordering guide).

HLX22-T is suitable for direct wall mounting and for installation on rails according to DIN EN 50022.

For easy duct mounting a duct mounting kit is available as an option.

An optional display indicates the actual T values.

duct mounting kit:

Typical Applications

pharmaceutical industry
clean rooms
storage rooms
green houses
cooling chambers

Features

accuracy $\pm 0,1^{\circ}\text{C}$ at 20°C
interchangeable probes
remote sensing probe up to 10m (32.8ft)
measuring range $-40...80^{\circ}\text{C}$ ($-40...176^{\circ}\text{F}$)
optional display
traceable calibration
cost saving, easy loop-calibration of T probes
